

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended) An information transmission system, comprising:
a portable terminal having transmission function of data; and
a travel server for memorizing personal data and various kinds of data therein,
wherein:

said travel server produces travel data necessary for traveling of an each person, from the personal data, including destination information of travel therein, and the various kinds of data, which are memorized in said travel server, and transmits the travel data from said travel server to said portable terminal, depending upon both of location information of said portable terminal and time information programmed in advance, wherein timing of transmission of the travel data depends on the time information programmed in advance.

2. (original) An information transmission system, as described in the claim 1, wherein said travel data is changed to newest data when changing is made on said various kinds of data.

3. (previously presented) An information transmission system, as described in the claim 1, wherein destination of travel, means for moving, identification means of said portable terminal are registered in said travel server, as the personal data, and said travel server produces the travel data for the each person and for each the destination from the personal data and the various kinds of data, so as to transmit them to said portable terminal.

4. (previously presented) An information transmission system, as described in the claim 1, wherein destination of travel, means for moving, identification means of said portable terminal are registered in said travel server, as the personal data, and

also information of facilities and sightseeing information corresponding to the destination of travel are registered in said travel server, as the various kinds of data.

5. (original) An information transmission system, as described in the claim 1, further comprising area servers located in plural numbers of areas, wherein the various kinds of data, including the information of facilities and the sightseeing information, which are accumulated in said local area servers, are taken out from said local area servers, so as to be used for producing of the travel data.

6. (original) An information transmission system, as described in the claim 1, wherein said information transmission system further comprises area servers located in plural numbers of areas, and said travel server accesses to the local area server nearest to a present location of said portable terminal when transmitting the data on said portable terminal.

7. (previously presented) An information transmission system, as described in the claim 1, wherein information of facilities and sightseeing information corresponding to the destination of travel are registered in said travel server, respectively, as the various kinds of data, and said various kinds of data is supplied to a broadcasting station for broadcasting a travel program.
